CiteAura GEO Diagnostic Report

Project: CiteAura - Delivery date: 2026-08-22 - Source: 01-Audit-Report.md

- Official website: https://citeaura.com
- Audit date: 2026-08-21
- Pages reviewed: 5 (4 scored, 0 not scored, 1 excluded)

This report tells you which website content currently hurts AI access, extraction, and mention, and what to change.

What to change

These are the website problems that currently hurt AI crawling, extraction, and mention. Each item says what to change. The tables below are the evidence.

1. AI cannot reliably access the site

- **robots.txt blocks AI crawlers** (P0, site-wide)
- Why it hurts AI: The current policy blocks: GPTBot, ClaudeBot, Bytespider, Google-Extended.
- Change this: Confirm the policy is intentional; allow only the crawlers required by the measurement and publishing strategy.

- **sitemap.xml was not detected** (P1, site-wide)
- Why it hurts AI: The crawl did not find a sitemap describing the site's canonical public URLs.
- Change this: Publish a current sitemap and reference it from robots.txt.

- **Missing canonical URL** (P2, 2 page(s))
- Why it hurts AI: This public page does not declare its preferred canonical URL.
- Change this: Add a self-referencing or otherwise correct canonical URL.
- Pages: `https://citeaura.com/privacy`, `https://citeaura.com/terms`

2. Pages do not state facts models can quote

- **Guide lacks an extractable sequence of steps** (P1, 1 page(s))
- Why it hurts AI: The page promises procedural guidance but no clear ordered process was detected.
- Change this: Present the verified procedure as ordered steps with explicit actions and prerequisites.
- Pages: `https://citeaura.com/docs`

- **Missing a clear definition** (P1, 1 page(s))
- Why it hurts AI: The expected definition block was not detected on this home page.
- Change this: State plainly what the subject or offering is and who it serves.
- Pages: `https://citeaura.com`

3. Machine-readable brand facts are missing

- **No JSON-LD detected for this content page** (P1, 1 page(s))
- Why it hurts AI: The page has no machine-readable structured data describing its visible content.

- Change this: Add only Schema.org types and properties supported by visible content and verified facts.
- Pages: `https://citeaura.com/docs`

- **llms.txt was not detected** (P2, site-wide)
- Why it hurts AI: No optional llms.txt facts index was found at the site root.
- Change this: Consider publishing a maintained facts index; do not treat it as a substitute for crawlable pages.

Technical Baseline

Check	Result
sitemap.xml	Missing
llms.txt	Missing
AI crawlers blocked	GPTBot, ClaudeBot, Bytespider, Google-Extended
Accessible pages	5/5
English content pages (120+ words)	3

- Applicable site score: **88.9**
- Scoring coverage: **4/4 eligible pages (100.0%)**
- Not scored: **0**; excluded: **1**
- Scoring method: only evidence-backed checks applicable to each page role are counted.
- Unmeasured AI visibility and withheld site scores are disclosed below; they do not make this report incomplete.

Grade Distribution

Grade	Pages
A	3
B	1
C	0
D	0
Not scored	0
Excluded	1

Priority Pages

Score	Words	Grade	Role	Evaluation	Page	Primary Gaps or Reason
82.2	1363	B	Documentation or guide	Evaluated	https://citeaura.com/docs	No JSON-LD detected for this content page, Guide lacks an extractable sequence of steps
91	628	A	Legal or policy page	Evaluated	https://citeaura.com/privacy	Missing canonical URL
91	665	A	Legal or policy page	Evaluated	https://citeaura.com/terms	Missing canonical URL
92.1	23	A	Home page	Evaluated	https://citeaura.com	Missing a clear definition

Score	Words	Grade	Role	Evaluation	Page	Primary Gaps or Reason
Not scored	2	-	Application or utility page	Excluded	https://citeaura.com/app	Application and utility pages are excluded from public-content scoring.

Extraction Coverage

Block	Missing Pages
Definition	1/1
Step-by-step guidance	1/1

AI Visibility Sampling

Confidence: Limited baseline

- Limitation: Only 13 valid samples; at least 20 are required per period
- Limitation: Only 1 sampled platform(s); at least 2 are required for cross-platform conclusions
- Do not generalize these observations to global AI visibility or unsampled platforms.
- Observed changes do not establish optimization attribution; use deployment evidence and repeated comparable periods.

Sampling date: 2026-08-13

Platform	Market	Sampling Mode	Samples	Mention Rate	Top 3 Rate	Official Domain Cited
Configured OpenAI-compatible provider	Global	API - Parametric knowledge	13	0.0%	0.0%	0.0%

Prompt and Competitive Insights

These observations are derived from the same current samples used by the workspace. They prioritize follow-up work; they do not claim a ranking or forecast an outcome.

- Prompt Explorer: 17 of 17 questions have valid samples; minimum per-provider/mode sample target: 3.
- Cohort evidence: 0 of 17 questions meet the minimum in every observed provider/mode cohort; missing cohort samples remain blocked.
- Competitive heatmap: 13 valid samples across 1 separate sampling cohorts.
- Takeover candidates: 0; an alert requires at least five competitor hits and separated Wilson 95% intervals in the same cohort.
- Campaign proposals: 12; human approval is required and automatic publication is disabled.

Evidence readiness

- Overall measurement: **Limited baseline**.
- Per-question evidence: **Per-question cohort evidence still limited** (0/17 questions at the minimum evidence target).

- Attribution: **Single baseline**. Comparable deltas require unchanged questions, providers, models, sampling modes, and measurement policy.

Highest-priority prompts

Question	Priority	Samples	Mention rate	Wilson 95% interval	Reason
What are the best GEO platforms for tracking whether AI assistants mention and recommend my brand?	needs_sampling	1	0.0%	0.0%-79.3%	Evidence is incomplete across provider and sampling cohorts; collect 2 more sample(s); No ready content asset is mapped to this prompt
I run a small brand with limited marketing resources. Which GEO tool is practical for improving visibility in AI search?	needs_sampling	1	0.0%	0.0%-79.3%	Evidence is incomplete across provider and sampling cohorts; collect 2 more sample(s); No ready content asset is mapped to this prompt
How is a GEO platform different from an SEO suite or a traditional brand monitoring tool?	needs_sampling	1	0.0%	0.0%-79.3%	Evidence is incomplete across provider and sampling cohorts; collect 2 more sample(s); No ready content asset is mapped to this prompt
What should I compare when evaluating tools that measure brand visibility across ChatGPT, Claude, Gemini, and other AI engines?	needs_sampling	1	0.0%	0.0%-79.3%	Evidence is incomplete across provider and sampling cohorts; collect 2 more sample(s); No ready content asset is mapped to this prompt
Can I manage generative engine optimization in-house with software instead of hiring a GEO agency?	needs_sampling	1	0.0%	0.0%-79.3%	Evidence is incomplete across provider and sampling cohorts; collect 2 more sample(s); No ready content asset is mapped to this prompt
Is there a better way to monitor AI brand mentions than manually running prompts every week?	needs_sampling	1	0.0%	0.0%-79.3%	Evidence is incomplete across provider and sampling cohorts; collect 2 more sample(s); No ready content asset is mapped to this prompt
How much does GEO software typically cost for an independent creator or a small company?	needs_sampling	1	0.0%	0.0%-79.3%	Evidence is incomplete across provider and sampling cohorts; collect 2 more sample(s); No ready content asset is mapped to this prompt
Do GEO platforms offer affordable plans for auditing and tracking a single brand?	needs_sampling	1	0.0%	0.0%-79.3%	Evidence is incomplete across provider and sampling cohorts; collect 2 more sample(s); No ready content asset is mapped to this prompt

Measurement cohorts

Provider	Sampling mode	Samples
Configured OpenAI-compatible provider	API - Parametric knowledge	13

Campaign proposal gate

- Blocked: 12; review required: 0; ready for approval: 0.
- Expected impact is a hypothesis only. Re-test with the same question set, provider, sampling mode, and measurement policy.
- No proposal authorizes publication; factual review, asset review, and explicit human approval remain required.

Campaign proposals

Status	Target question	Next step
blocked	What are the best GEO platforms for tracking whether AI assistants mention and recommend my brand?	Collect comparable samples
blocked	I run a small brand with limited marketing resources. Which GEO tool is practical for improving visibility in AI search?	Collect comparable samples
blocked	How is a GEO platform different from an SEO suite or a traditional brand monitoring tool?	Collect comparable samples
blocked	What should I compare when evaluating tools that measure brand visibility across ChatGPT, Claude, Gemini, and other AI engines?	Collect comparable samples
blocked	Can I manage generative engine optimization in-house with software instead of hiring a GEO agency?	Collect comparable samples
blocked	Is there a better way to monitor AI brand mentions than manually running prompts every week?	Collect comparable samples
