交付产物与客户交付包

首次运行生成的是诊断最终包，可将 01–06 号文档发送给客户。交付包遵循 3 轮独立采样与统计置信度审计标准；证据完整时秒级打包，绝不重复采样。

当前摘要

Site-wide GEO audit pending

Review the highest-priority finding before interpreting visibility results.

Re-run site crawl and page audit · 已测量证据 · 4 样本

证据边界 API keys are optional. The diagnostic pack still reports site and content findings · Currently only 4 valid samples; mention rates stay limited · Action tickets pending

交付准备清单

交付前复核

Site-wide GEO audit pending — Re-run site crawl and page audit
API keys are optional. The diagnostic pack still reports site and content findings — Add a key or import a manual sheet only if you want measured mention rates
Currently only 4 valid samples; mention rates stay limited — Collect at least 20 valid samples before publishing visibility claims
Action tickets pending — Generate action plan
Diagnostic pack not compiled yet — Build the diagnostic pack

未测量 Limited baseline
